

Nabeel Ilyas - TTS Student: 2003 - 2010

Current role: Dentist, Slough

Career pathway:

Since leaving Thomas Telford I have completed my 5 years of dental school in Kings College London. I am now undertaking a year of further training in Slough. Whilst at university I was heavily involved in the sports teams, and towards the end of my course, provided advice to prospective medical and dental students.

It was also great to go back to TTS in July 2015 to talk to prospective medicine and dentistry students about their university applications and personal statements.

Advice for students:

Dentistry is a fun and ever changing career. If you enjoy being practical and communicating with people then seriously consider dentistry. It is still a lot of hard work but is good fun and allows for some artistic license.

Plans for the future:

I am planning on completing a second year of further training before either specialising or working in general practice.

Best memory of your time at Thomas Telford?

The trip abroad to Berlin-Krakow! It was good fun as well as a moving experience!
